

REMASKIRT System CB 195

The REMASKIRT CB 195 sealing profile with matching mounting rails for your conveyor belt.

REMASKIRT CB 195 makes an exceptionally good seal. The special sealing lips with their labyrinth effect keep transported material on the conveyor belt and reduce contamination and loss of material. The sealing lips are held down on the conveyor belt by their own weight, thus preventing damage. In combination with the **mounting rails** fitting and servicing of the sealing is simplified. An optimally functioning seal is guaranteed.

REMASKIRT sealing system

Advantages

- Excellent sealing, particularly of fine-grain and dusty material
- The seal is held down on the conveyor belt by its own weight and the flexional pre-tension
- Permanent seal and a long service life
- Whirled-up fine material is retained by the sealing grooves and therefore remains on the conveyor
- The skirting only needs to be adjusted once when fitting (maintenance-free)
- The most effective seal possible is achieved by using in conjunction with REMASLIDE impact bars
- Easy and fast fitting
- Rails are primed and coated with COROPUR and therefore protected against corrosion

Technical data

REMASKIRT CB 195 sealing lip

Mounting rail for REMASKIRT CB 195

Ordering information

Ref-No: 550 2651 REMASKIRT CB 195 Sealing lip

Roll length: 31 m

Ref-No: 550 2660 Mounting Set

- 10 x mounting rail, bent à 1200 mm
- 10 x mounting rail, flat à 1200 mm
- Mounting screws, galvanized with self-locking nut
