

# REMASLIDE

*The shock absorber for your conveyor belts at feeding points and transfer stations*

## Advantages:

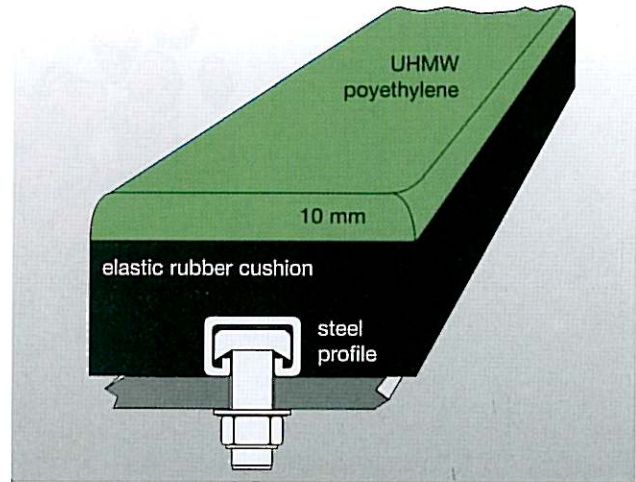

- Effective prevention of damages to conveyor belts through all-over support.
- The belt is subjected to static load only, therefore considerable reduction of belt maintenance and repair costs.
- Eliminates belt sagging and ensures optimum sealing with REMASKIRT skirting rubber.
- Minimizes downtimes and increases productivity.

# REMASLIDE

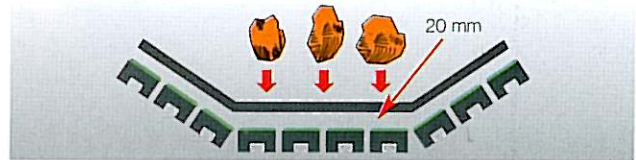

## Product characteristics

- The UHMW polyethylene surface has outstanding sliding properties.
- The skived front and rear end of the polyethylene ensures smooth running of the belt.
- The elastic special rubber substratum absorbs impact energy.
- Durable bond between all components through hot vulcanization.
- Integrated steel profiles enable easy and quick mounting with T-bolts.
- Complete steel constructions for REMASLIDE feeding stations are available.

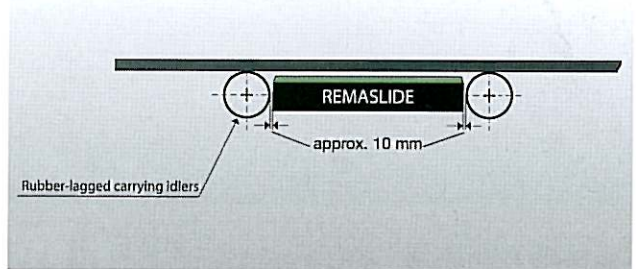

## Mounting schema

The distance between belt and impact bars should be approx. 20 mm in unloaded condition. This distance is achieved by corresponding carrying idlers before and after the impact bars.

## Impact bar arrangement

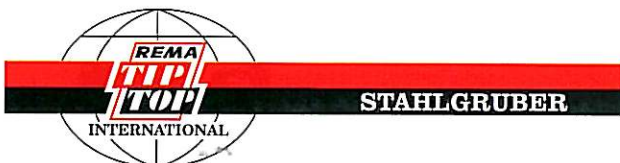

Belt width	Number of bars			Distance between bars (mm)		Carrying idler width (mm)
	Side	Centre	Side	Side	Centre	
500	1	2	1	50	0	200
650	2	2	2	25	25	250
800	2	3	2	50	5	315
1.000	3	3	3	25	25	380
1.200	3	4	3	55	20	465
1.400	4	5	4	45	7	530
1.600	5	5	5	25	25	600
1.800	5	6	5	25	10	670
2.000	6	6	6	20	20	750

## REMASLIDE Impact Bars

Ref. No.	Description	Dimensions (mm)		
		H	W	L
539 0605	Impact bar KG-02/PE	52	100	1220
539 0612	Impact bar KG-03/PE	80	100	1220
539 0629	Impact bar KG-04/PE	100	100	1220

The REMASLIDE impact bars are supplied as a set, complete with 4 TT fasteners (M16 x 40) for each bar.
